## DiBlasio's Bop Shop

For treble and bass clef instruments, Denis DiBlasio's books introduce players to improvisation basics at a carefully determined pace. Easy-to-understand text and humorous illustrations by Steve Wiest make learning an enjoyable adventure.

**DiBLASIO'S BOP SHOP:** Getting Started In Improvisation ..... \$11.00 \_\_\_\_20860

## Effective Etudes For Jazz

Mike Carubia and Jeff Jarvis have created these 2 sets of etudes based on the chord changes to popular jazz standards. Students will learn to interpret and improvise over the chord progressions. Hear how seasoned jazz musicians interpret the etudes, then play along with the rhythm section. Perfect for jazz band auditions, solo festivals, and recitals.

## Essential Scale Studies For Improvisation

This book of 205 jazz exercises by Tony Dagradi for all instruments builds solid technical skills in players at all experience levels -- developing players can play the basic exercises, those with more experience can play the variations which follow each basic etude. Used with great success by Dagradi's students at Loyola University in New Orleans, the spiral binding ensures the book stays open during practice.

## The Jazz Commandments

### (Guidelines For Jazz Articulation And Style)

This book with MP3s by Jerry Tolson addresses articulation and style situations that are commonly found in jazz music by introducing a set of guidelines that can be used to guide decisions regarding the treatment of notes and rhythms in the swing style. Exercises and catchy tunes that can be used to sound more stylistically accurate and authentic make this a valuable resource for directors, individual students, combos, and big bands. Users of this book and MP3s will see immediate improvement in jazz articulation and style performance.

### EXPANDED SECOND EDITION

## Jazz Improvisation: The Goal-Note Method

Shelton Berg's programmed text for a 2-4 semester improvisation course. This approach is consonance-based, emphasizing structural pitches and harmonic considerations rather than scale-derived melody. This logical, step-by-step method is based on the premise that when consonant tones are surrounded with characteristic jazz formula, successful jazz improvisation results.

## Playing Guitar In A Jazz Ensemble

When recruiting guitar students for a jazz ensemble, it is often the case that the guitarist does not read music notation well, or at all. The goal of this book by Dave Ness is to simplify things for the jazz guitarist. By focusing on Freddie Green style, the inexperienced jazz ensemble guitarist has a window into the jazz style that will help them become a solid contributing member of a swinging rhythm section. Starting with Freddie Green chords and voicings, the book tracks these voicings across different styles from blues and swing to bossa nova. From there, the book explores voicings on higher strings that can be used for accompanying soloists (comping). Finally, the book explores jazz scales for the guitar that can be used for soloing. Chord shapes and voicings are shown in tab, standard notation, and chord charts to appeal to all guitar levels and backgrounds, and the video examples will help with understanding the major concepts.

## Section Workouts

These six pieces were conceived as a tool to help the each jazz section refine their skills as a unit of the contemporary big band including balance, blend, articulation and phrasing. Optional rhythm section parts are included, along with written or ad lib solos for any player. Two down loadable MP3 tracks are included for each piece: a full performance with rhythm section, and a rhythm section only MP3 that can be used in rehearsals or performances without a rhythm section.
